

**SUPPLEMENT 2
TO THE CALL FOR PAPERS
38TH OTDK
BIOLOGY SECTION**

AUTHOR CONTRIBUTION

I, the undersigned (**name of the student submitting the paper to be filled in here**), declare that I/we have participated¹ in the following work processes for the paper submitted to the 38th OTDK (**title of the paper to be filled in here**):

Subtask²	Extent of participation (on a five-point scale[#])
<i>Collection of animals/plants to be studied in one of the three study years^{m1}</i>	3
<i>Preparation and processing of the preparations to be tested</i>	5
<i>Design of PCR primers for 3 of the 5 cases described in the TDK paper^{m2}</i>	4
<i>Optimization and performance of the western blot reactions described in the TDK paper, evaluation of the results³</i>	3
<i>Statistical processing of data^{m4}</i>	1
...	...

Date: <Place>, <Date>

(Please replace or modify the parts marked with an asterisk as appropriate).

For two-author TDK papers:

Student submitting the TDK paper (*name*)
signature

Co-author (*name*)
signature

I confirm that the information contained in the declaration is correct:

Supervisor (*name, workplace*)
signature

¹ Do not include in the list any sub-tasks of the research project in which you did not participate at all.

² The following list is a sample, which can be freely modified and extended.

#Explanation:

Please rate your extent of involvement in the work process on a five-point scale. The meaning of each value on the scale:

5 – After preparation, I completed the whole task independently, to the extent required for the project.

4 – After preparation, I completed more than half of the whole task independently, to the extent required for the project.

3 – After preparation, I completed more than half of the subtask independently, to the extent required for the project.

2 – After preparation, I completed less than half of the subtask independently, to the extent required for the project.

1 – I completed the subtask with continuous assistance to the extent required for the paper.

^{m1} The student author participated in one year of the 3 years of fieldwork. This year, together with their partner, they carried out fieldwork, during which they independently collected materials related to the species forming the basis of the TDK paper for one half of the area/study period. The rest of the collection was done by others.

^{m2}Of the 5 primers used, the student designed three himself, the others were ready-made.

^{m3}The design (e.g.: sample order+quantity) and theoretical setup of the western blot reactions was completed by the participant, however, the "wet" part of the work was largely done by the laboratory assistant. The evaluation was carried out by the participant.

^{m4}The statistical processing of the data was carried out by the participant, with the continuous assistance of their supervisor.
