

**SUPPLEMENT 1
TO THE CALL FOR PAPERS
38TH OTDK
LAW AND POLITICAL SCIENCE SECTION**

1. The language of the TDK paper and the presentation:

The language of the OTDK is Hungarian. The application must be submitted in Hungarian, and the presentation must be held in Hungarian.

2. Content requirements for the TDK paper:

A TDK paper can be entered for the OTDK only once and in one section. If an author submits more than one TDK paper, they must declare during the submission process that there is no substantial or significant overlap between the papers, and any overlap between the submitted papers will also be examined by the Section Committees and the Section organizers during the verification of submissions. The Section Committee may determine that the extent of overlap is not acceptable; in such cases, the author must choose which paper to present, and the remaining applications will be deleted. If the student fails to make the declaration during the application process, all submitted papers will be disqualified.

At the 38th OTDK, the use of AI must be indicated during the application process in the OTDT online system by means of a separate declaration in a way that allows for subsequent identification (the declaration will be available to reviewers and members of the Session Panel in connection with the TDK paper). The declaration must specify the relevant part of the content, the purpose of use, a brief description of the prompt (AI query), the name of the AI application used (model and version), and the date of access. In the OTDK presentation, the use of AI must be referenced in the ppt slides. **In all other respects, Supplement 6 of the General Call of 38th OTDK on the ethical use of artificial intelligence shall be followed.**

All TDK papers submitted to the OTDK will undergo AI and plagiarism checks. For the evaluation, the Law and Political Sciences Section Committee will establish a three-member special committee to review the results of the AI and plagiarism screenings. We specifically draw the attention of submitting students to the fact that plagiarism is not permitted in any form; even one's own work may not be cited without proper referencing (prohibition of self-plagiarism). TDK papers that demonstrably violate copyright laws or the rules on the use of artificial intelligence set forth in the OTDK calls will be disqualified from the OTDK by the OTDT Law and Political Sciences Section Committee, with simultaneous notification of the submitting student and their institution.

3. Formal requirements for the TDK paper:

Length limit:

The maximum length of the TDK paper is **2.5 author's sheets, or 100,000 characters (a maximum of 50 pages in any layout), including spaces, notes, bibliography, and appendices.** TDK papers that exceed the maximum length cannot be uploaded to the OTDT online system.

TDK papers must be uploaded in **PDF format.** The maximum file size is 10 megabytes.

General formal requirements:

Font: Times New Roman

Font size: 12 pt

Line spacing: 1.5

Margin: 2.5 cm

Cover:

The complete paper must TDK be uploaded to the OTDT online system with a cover page containing only the title of the paper and the date of completion of the manuscript (year, month, day). Neither the cover page nor the paper as a whole may contain any data or information that could identify the author(s), the supervisor(s), or the submitting institution.

The mandatory cover page template for the 38th OTDK Law and Political Sciences Section is provided in Supplement 3 of the Section Call.

4. Printed TDK paper is not required.**5. Rules for the abstract:**

Only the main text of the abstract needs to be uploaded to the OTDT online system (the other data: names of authors, institution, supervisor, etc. are automatically generated by the online system).

The language of the abstract is Hungarian.

The length of the abstract is minimum 500 and maximum 2,500 characters.

In the abstract, the students' original findings must be presented in a brief (maximum 500 characters) summary. The abstract summary must include the research results and a brief extract of the conclusions, in line with the general evaluation criteria. A volume will be prepared from the abstracts of the TDK papers selected for presentation.

6. Evaluation rules for the TDK paper:

The TDK paper is subject to an independent preliminary evaluation by jury members centrally appointed by the institution organizing the Law and Political Sciences Section. The submitted TDK paper is evaluated through a written review. The maximum score that can be obtained in the written review is 60 points. The final evaluation score is the average of the scores of the three evaluations. The criteria for the written evaluation and the calculation method for the scores are provided in Supplement 2 of the Law and Political Sciences Section Call. Section Panel members record their evaluations of the submitted papers in the OTDT online system by the deadline specified by the Law and Political Sciences Section. Written reviews — without scores — are published by the organizing institution of the Law and Political Sciences Section in the OTDT online system before the opening day of the conference.

The faculties nominating the Section Panel members undertake the responsibility to prepare their nominees to use the online review system appropriately. The TDK secretaries of the faculties also monitor whether the Section Panel members fulfil their review duties by the specified deadline. Each review must be uploaded so that Section Panel members can view each other's evaluations only after all panel members have submitted their opinions. If a

Section Panel member does not upload their review by the specified deadline, that faculty cannot nominate the individual as a jury member in the next OTDK.

In each session of the conference, TDK papers are presented before the Section Panel, reviewed by student opponents from partner institutions, and discussed in a public debate held in Hungarian that also includes questions from the Session Panel. At the conference, participants will have 15 minutes to present their TDK paper (presentation), followed by a discussion. During the oral presentation of the TDK paper, evaluation is conducted through an oral review and scoring, with a maximum possible score of 40 points. The final oral evaluation score is the average of the three review scores. The presentation is evaluated by a Section Panel composed of members delegated by the faculties that submitted the papers. During the oral evaluation and scoring of the presentation, the reviewers and student opponents consider the criteria specified in Supplement 2 of the Law and Political Sciences Section Call.

The TDK papers and the performance of the authors during their presentation are evaluated by a three-member Section Panel for each session. The organizers of the Law and Political Science Section strive to ensure that the Section Panel members for each section are qualified academics. The members of the jury must be recognized experts in the field of law and political science. The supervisor of a paper presented in the category cannot be a jury member.

Student opponents cannot be instructors, PhD students, or authors of any TDK paper accepted for the OTDK in their own category.
